

## How to install iReceiptMail:

1. Drag and drop **iReceiptMail** into the **Applications** folder
2. Open **Apple Mail & iReceiptMail** and follow the installation instructions on screen

The following extra steps are necessary to fully activate iReceiptMail on **macOS Mojave (10.14) or other versions of macOS up to Monterey (12)**:

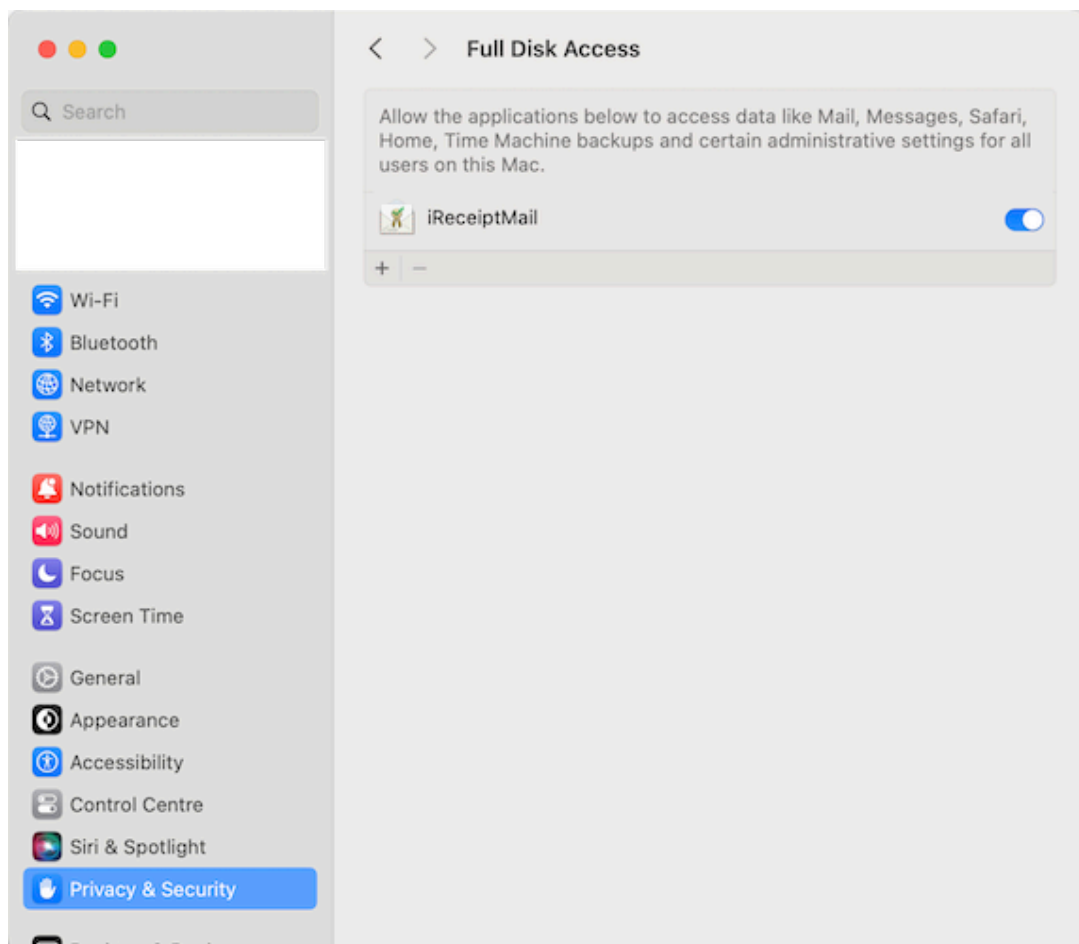

3. After iReceiptMail is up and running, open **System Preferences** from the **Dock**
4. Open the **Security & Privacy** pane
5. Click on the **Privacy** tab then select **Full Disk Access** from the list on the left

6. Unlock the window to make changes using the padlock at the bottom
7. Click on **+** and select iReceiptMail from the list of applications, then press **Open**
8. Restart **Mail** and **iReceiptMail**, done!!!

If you are using **macOS Ventura or more recent versions of macOS**:

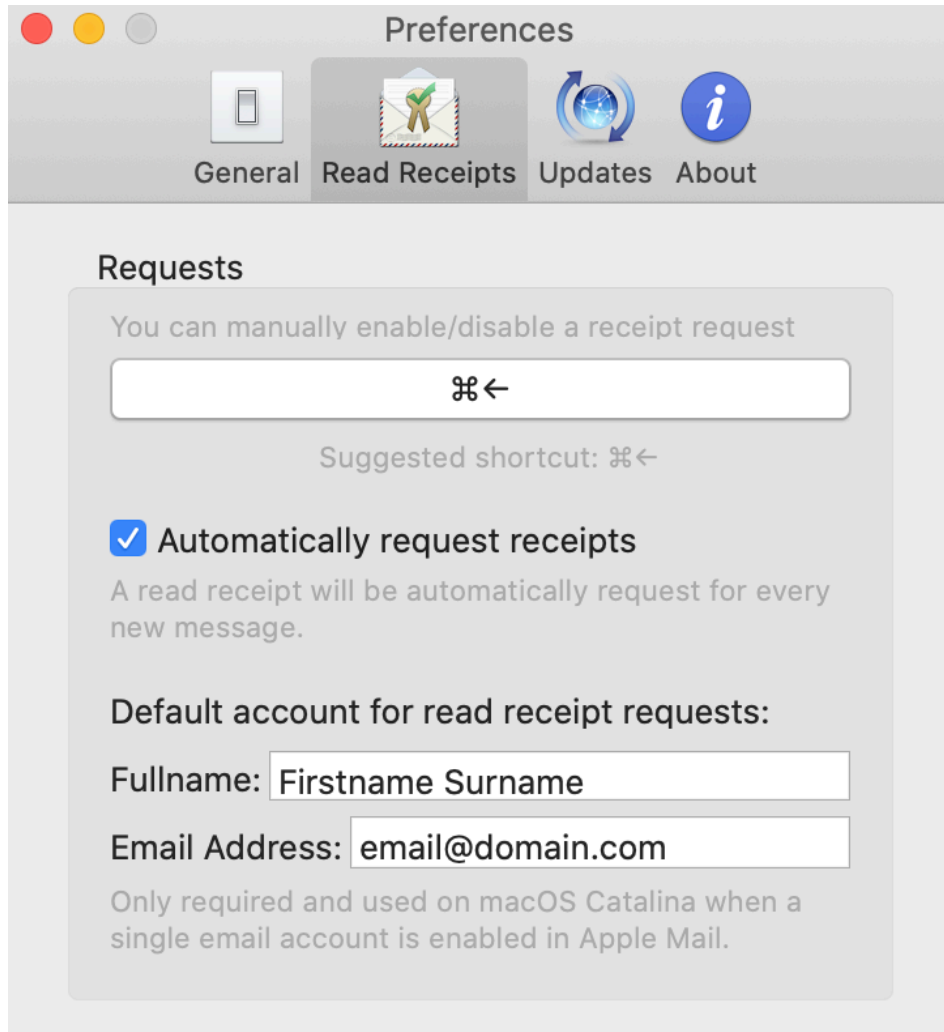

1. After iReceiptMail is up and running, open **System Settings** from the **Dock**
2. Select the **Privacy & Security** from the list of tabs on the left
3. Open the **Full Disk Access** pane

6. Click on **+** and select iReceiptMail from the list of applications, then press **Open**
7. Restart **Mail** and **iReceiptMail**, done!!!

You will also need to set up the default email account for read receipt requests, as follows:

1. Open iReceiptMail **Preferences**
2. Type your full name and email address as shown below

3. Done!!!
