# How to install iReceiptMail:

1. Drag and drop **iReceiptMail** into the **Applications** folder
2. Open **Apple Mail** & **iReceiptMail** and follow the installation instructions on screen

The following extra steps are necessary to fully active iReceiptMail on **macOS Mojave and macOS Catalina**:
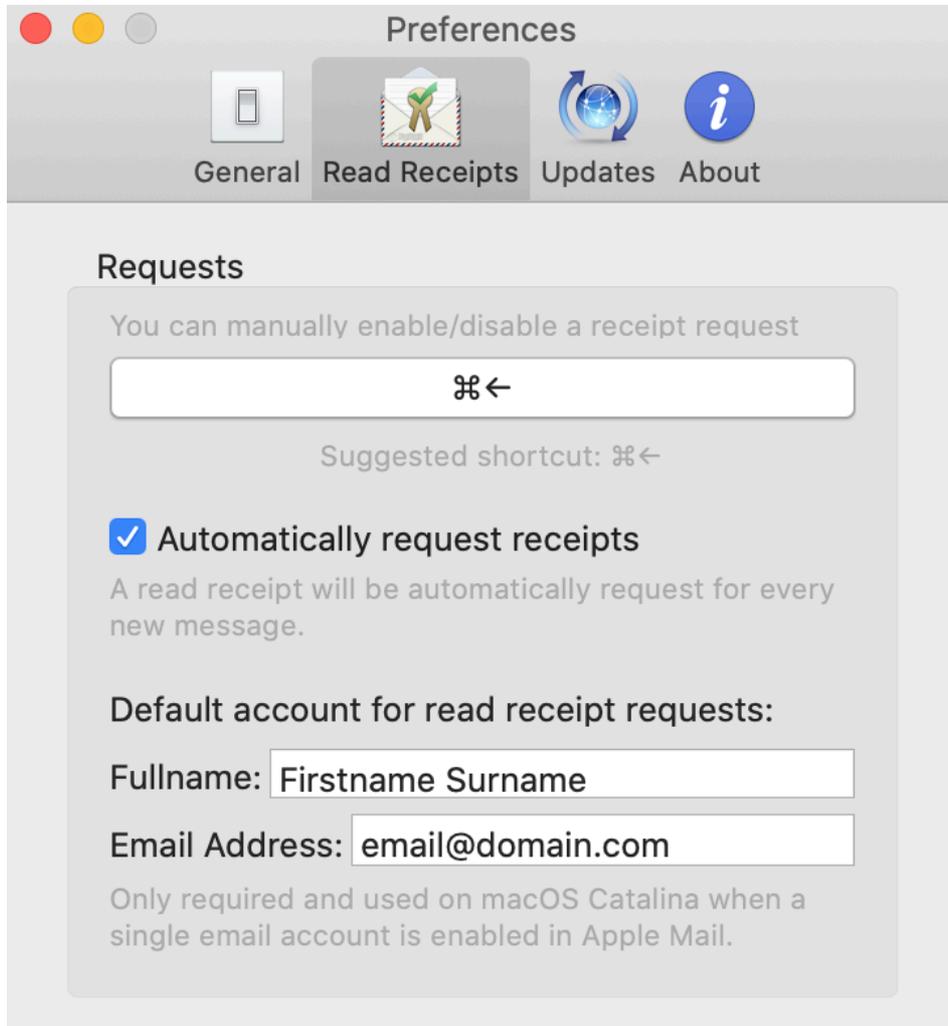

3. After iReceiptMail is up and running, open **System Preferences** from the **Dock**
4. Open the **Security & Privacy** pane
5. Click on the **Privacy** tab then select **Full Disk Access** from the list on the left

6. Unlock the window to make changes using the padlock at the bottom
7. Click on **+** and select iReceiptMail from the list of applications, then press **Open**
8. Restart **Mail** and **iReceiptMail**, done!!!

If you are using **macOS Catalina**, you also need to set up the default email account for read receipt requests, as follows:

1. Open iReceiptMail **Preferences**
2. Type your full name and email address as shown below

3. Done!!!
